DETAILED ACTION

1. The Examiner acknowledges Applicant's submission of the amendment filed on 10/20/04. Claims 1-17 are now pending.

NEW MATTER in SPECIFICATION and DRAWINGS

2. The amendment filed 10/20/04 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. In particular:

Applicant's original specification does not recite "one quarter-inch (1/4") thickness".

Applicant's original specification does not recite "manufacturer's mark 51".

Applicant's original specification does not recite "leaving no excess condom membrane 50".

Applicant's original specification does not recite "collapsed state".

Applicant's original specification does not recite "the two sections of the condom are not discernable".

Applicant's original specification does not recite "the first section 16 and second section 24 of condom 10 are not discernable through the individual condom packaging".

Applicant's original drawings do not show element 51 as shown in Figure 12.

Applicant's original drawings do not show element 50 as shown in Figures 9, 10 and 11.

Applicant's original drawings do not show element 24 as shown in Figures 5, 6 and 7.

NEW MATTER in CLAIMS

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1-17 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contains subject matter which was not described in the specification (see above) in such a way as to reasonably convey to one skilled in the relevant art that the inventor, at the time the application was filed, had possession of the claimed invention. Applicant is required to cancel the new matter in the reply to this Office Action.

Drawings

5. Figures 1-12 of the drawings filed on 10/20/04 are objected to, because the element numbers and figure labels need to be thicker and clearer.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
